DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On page 10, line 2, "Figure 4" should instead be "Figures 4A and 4B". In addition, there is no discussion of Figures 8A, 8B, 8C, 8D, 9A, 9B, 10A, 10B and 10C. Appropriate correction is required.

Claim Objections

2. Claim 5 is objected to because of the following informalities: The should only be one period at the end of the sentence. Appropriate correction is required.

Oath/Declaration

3. There seems to be a discrepancy in regard to 60/295,635 and 60/295,634, the date cited in the Declaration of May 31, 2001 is different than the one cited at the Patent Office of 06/04/2001. If the Patent office is incorrect, please send a letter making the correction. If the date should be June 6, 2001, then please send in a Declaration.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Touched et al. (3,881,959).

Touched et al. teaches in column 2, lines 22-33 and Figure 1, an ion permeable porous separator 4 is disposed outside of the electrolyte absorption paper 3 to electrically separate the cathode carbon tube 1 from anode active mass 5. The anode active mass is contained in an anode casing.

Allowable Subject Matter

6. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
